

VigiTrust eLearning and Information Security Awareness

A key component of VigiTrust Solutions are the various Cyber Security Awareness programs delivered through eLearning using a LMS (Learning Management System). Training and awareness are closely integrated into the VigiTrust compliance portals, and now supports around 100,000 users across more than 80 countries with considerable growth forecast. VigiTrust eLearning repository has over 50 modules covering a range of topics including

VigiOne now intends to offer organizations large and small the opportunity to purchase an annual subscription for Security Awareness as a Service.

VigiOne – Security Awareness as a Service (SAaaS)

VigiOne Security Awareness as a Service is a highly configurable solution for organizations to provide their staff and stakeholders with access to a modular online LMS populated with regularly updated eLearning courses on a range of topics. The initial range of topics are as follows with three levels of course for each topic area, the fundamentals course includes the Introduction course, and the Intermediate course the two previous courses (Introduction & Fundamentals).
